Please be advised that Jarrow Formulas, Inc. is marketing a product containing a "Structure and Function" statement on the label. According to the notification requirements set forth by the DSHEA (Dietary Supplement Health and Education Act, 1994) legislation, please be advised of the following:

Name of Product: MSM Sulfur, 100 capsules, 200 capsules, + powder forms

Active Ingredient(s): Methyl-Sulfonyl-Methane

Claim(s): "Rich Source of Organic Sulfur." Jarrow Formulas' MSM SulfurTM is an organic source of bioavailable sulfur, an antioxidant mineral found in major structural molecules of the body such as cartilage. The sulfur from MSM is used to produce glycosaminoglycans (or mucopolysaccharides) such as chondroitin sulfate, dermatan sulfate and hyaluronic acid. These sulfur containing glycosaminoglycans are found in high concentrations in connective tissue, including joint cartilage, skin and collagen.

The following disclaimer appears on the label: These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

These claims are limited to, and a result of, what we believe to be a substantial body of scientific evidence supporting the functional role of these nutrients. A compendium of relative published research substantiating the above statement(s) is on file at the corporate office.

Respectfully submitted,

Siddharth S. Shastri, B.A., C.C.N.

Director of Product Development

USAGE: As a dietary supplement, take one to four capsules a day, or as directed by your qualified health consultant.

Jarrow Formulas' **MSM Sulfur™** is an organic source of **bioavailable sulfur**, an antioxidant mineral found in major structural molecules of the body such as cartilage. The sulfur from **MSM** is used to produce glycosaminoglycans (or mucopolysaccharides) such as chondroitin sulfate, dermatan sulfate and hyaluronic acid. These **sulfur** containing glycosaminoglycans are found in high concentrations in connective tissue, including joint cartilage, skin and collagen.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

Lot #. Best Used Before:

SUGGESTED USAGE: As a dietary supplement, take 1 to 4 capsules a day, or as directed by your qualified health consultant.

Jarrow Formulas' **MSM Sulfur™** is an organic source of **bioavailable sulfur**, an antioxidant mineral found in major structural molecules of the body such as cartilage. The sulfur from **MSM** is used to produce glycosaminoglycans (or mucopolysaccharides) such as chondroitin sulfate, dermatan sulfate and hyaluronic acid. These **sulfur** containing glycosaminoglycans are found in high concentrations in connective tissue, including joint cartilage, skin and collagen.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

SUGGESTED USAGE: As a dietary supplement, take 1/4 to 1/2 teaspoon once or twice a day, or as directed by your qualified health consultant.

Jarrow's **Methyl-Sulfonyl-Methane (MSM)** is an organic source of **bioavailable sulfur**, an antioxidant mineral found in the major structural molecules of the body. Because it is a rich source of sulfur, **MSM** is utilized in the production of glycosaminoglycans, or mucopolysaccharides, such as chondroitin sulfate, dermatan sulfate and hyaluronic acid. **Sulfur** enhances the structural integrity of these glycosaminoglycans found in high concentration in connective tissue, including joint cartilage, skin and hair.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.
